PROFILE

Career switcher from Operations & Analytics into DevOps Engineering. After relocating from Singapore to Munich (2018), completed German language studies up to B2 level and subsequently an intensive, project-based DevOps bootcamp, complemented by several independently completed cloud and automation projects. Seeking a Junior/Associate DevOps Engineer position. Hands-on experience with AWS, Kubernetes, Docker, Terraform, Helm, and CI/CD automation (GitLab CI/CD, GitHub Actions, Argo CD). Independently built containerized cloud infrastructure, Infrastructure as Code (IaC), and deployment/monitoring solutions using Prometheus, Grafana, and AWS CloudWatch.

German B2 (Course Completed) · English fluent

TECHNICAL SKILLS

Cloud & Infrastructure

- AWS (EC2, EKS, S3, VPC, IAM)
- Kubernetes
- Docker
- Helm

CI/CD & GitOps

- GitLab CI/CD
- Jenkins
- GitHub Actions
- Argo CD (GitOps)

Programming & Databases

- Python
- SQL (MySQL, PostgreSQL)

IaC & Scripting

- Terraform
- Ansible
- Bash Scripting
- YAML

Monitoring & Observability

- Prometheus
- Grafana
- AWS CloudWatch

Operating Systems

- Linux Administration (Ubuntu)

DEVOPS PROJECTS

GitOps CI/CD Pipeline – Go Web App 🔗

Technologies: Go, Docker, GitHub Actions, Helm, Argo CD, Kubernetes (Minikube)

- Built a complete GitOps pipeline: GitHub → GitHub Actions (CI) → Docker Hub → Argo CD (CD) → Kubernetes
- CI workflow with automated build, unit tests, and Docker image push on every push to main — reduced manual deployment steps.
- Continuous deployment via Argo CD with automatic sync, self-healing, and rollback capability — rollback time in test scenarios.
- Configured a multi-environment structure (Dev, Stage, Prod) with separate Helm chart values per environment
- Packaged and deployed the application on Kubernetes using Helm charts

AWS EKS WordPress Platform 🔗

Technologies: AWS EKS, Terraform, Kubernetes, Helm, Docker, GitLab CI/CD, Prometheus, Grafana

- Built a scalable Kubernetes infrastructure on AWS EKS, fully automated with Terraform (IaC) — infrastructure.
- Deployed WordPress and MySQL applications as containerized services using Helm charts
- Built automated GitLab CI/CD pipelines for build, test, and Kubernetes deployment
- Integrated Prometheus and Grafana to monitor Kubernetes workloads and alerting.

GitLab CI/CD Automation 🔗

Technologies: GitLab CI/CD, Docker, Linux

- Developed automated CI/CD pipelines for build, test, and deployment processes
- Optimized build and release workflows through CI/CD automation.

Infrastructure Automation 🔗

Technologies: Ansible, Magento, MySQL, Molecule, Testinfra

- Created reusable Ansible roles for automated, standardized infrastructure provisioning.
- Automated setup of Magento and MySQL environments.
- Validated infrastructure with Molecule and Testinfra.

Docker & FastAPI Project

Technologies: Docker, FastAPI, Python

- Containerized a FastAPI application with Docker for consistent development and test environments.

Monitoring & Observability

Technologies: Prometheus, Grafana, Kubernetes

- Built monitoring dashboards for centralized oversight of container and system metrics in Kubernetes environments.
- Configured alerting rules for critical cluster and application metrics.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (in preparation)
- German B2 – Anderwerk
- DevOps Engineer Training – DataScientest
- Data Science with Python – SkillUP

EDUCATION

DevOps Engineer

Panthéon SORBONNE (DataScientest / LIORA INT)

- AWS Cloud, Kubernetes, Docker, Terraform, Linux Administration, CI/CD, Monitoring & Observability

Bachelor of Engineering in Industrial Production

JNN College Of Engineering, India

WORK EXPERIENCE

Operations Analyst

Indian Bank

2017 – 2018

SINGAPORE

- Process analysis and operational support within the team
- Collaborated with internal teams and stakeholders on problem-solving and process optimization

Administration / Operations

Prosper Coal and Energy Pte Ltd

2016 – 2017

SINGAPORE

- Administrative process coordination and support of operational workflows

ChildCare

2011 – 2016

SINGAPORE

Customer Support & Operations

ICICI Bank / RiverVale Walk RC

2005 – 2011

SINGAPORE

- Handled technical customer inquiries and ticket management
- Communication and problem-solving experience in customer support

CONTINUING EDUCATION & CAREER TRANSITION

- 2018: Relocated from Singapore to Munich 2018 – 2026
MUNICH
- 2019–2025: Completed German language courses up to B2 level
- 2025: DevOps Engineering Bootcamp (DataScientest / LIORA INT) — targeted retraining from Operations & Analytics into Cloud and DevOps Engineering
